DURPANT IS GUILTY THE JURYMEN SAID

THE SAN FRANCISCO MURDER ER WILL HANG.

He Was Found Guilty of the Murder of Miss Blanche Lamont Aft r the Jury Had Debated Over the Matter Only Twenty Minutes-Prisoner Remains Unconcerned.

San Francisco, Cal., Nov. 2.-Theodore Durrant, assistant superintendent of Emanuel Baptist church Sunday school, was yesterday convicted of the murder of Blanche Lamont, for which he has been on trial since July 22 last. The jury was out twenty minutes, and arrived at the verdict on the first ballot. As there was no recommendation of mercy the punishment was fixed at death.

Judge Murphy finished his charge at 3:30, and the jury at once retired. There was no deliberation at all. The jury had evidently decided upon a verdict before they left the box. It was

It took the twelve men until of finance are also reported to have sus-3:50 o'clock before they settled themselves comfortably, and at 3:55 a knock on the door announced to the anxious AMERICAN COLLEGE BURNED. waiters that a verdict had been found. It took just five minutes of actual time to elect a foreman and take the one ballot necessary.

Mrs. Durrant and the prisoner talked and laughed together while waiting for the jury, as if an acquittal were a foregone conclusion. They were surrounded by half a dozen friends and the conversation was animated when it became whispered about that the jury had agreed upon a verdict. In an instant a hush fell upon the little circle that had gathered around the prisoner. Durrant's face, always pallid, assumed a ghastly hue and his mother was speechless. Judge Murphy, who had retired to his chambers, was summoned and took his place upon the bench. Clerk Morris asked the usual question as to whether the jury had agreed upon a verdict. Foreman Warren Dutton arose and replied in the affirmative. 'We, the jury," said he, "find the defendant, William Henry Theodore Durrant, guilty of murder in the first de-

The next moment men were cheering wildly, while women wept hysterically in excitement. The bailiff rapped loudly for order, but the tumult continued for a minute before anything like quiet could be brough out of the disorder, when District Attorney Barnes arose and asked that a day be et upon which the sentence of death should be passed upon the prisoner. Judge Murphy said that sentence would e passed next Friday, upon which day e would also set the day for the trial of ourrant on the charge of murdering innie Williams.

During the tumult that followed the nnouncement of the verdict Durrant nd his mother were lost sight of exept by the few who sat nearest them. s the last words of the verdict were ttered Durrant made a spasmodic efort to arise to his feet, but before he ould do so his mother, with a halfigh, threw her arms around his neck nd sunk back into the chair. His other's grief seemed to make Durrant orget his own position and for the ext few minutes he sat with his arms round her neck trying to soothe her. he long strain of the trial, however, ad completely shattered her self-conol and it was some time before Mrs. ourrant could leave the court room. ourrant recovered his old-time comosure as soon as he left his mother nd prepared to return to the county ail. With his overcoat swung careessly over his arm he walked leisurely ut of the room twirling his slight justache with apparently as little conern as if he were merely a spectator of, astead of the principal figure in, the

Aside from the spectators Mrs. Noble, lanche Lamont's aunt, and Maud Laont, the dead girl's sister, were apcrently the happiest persons in the om. When the verdict was anounced Maud Lamont sprung from er seat, clasped her hands and then ied of sheer excitement. Mrs. Noble ixed smiles with tears and shook ands with a number of friends who owded around to congratulate her. The case will be appealed to the sueme court, and it is expected nearly year will elapse before a decision will obtained. While it is not thought at any error has been committed, the fense has embraced every opportun-

ity to take exceptions to the rulings of THE TRADE REVIEW the court. The people of the city are almost as much excited over the verdict as they were when the horrible Emanuel church murders were first discovered. While some few of Durrant's TWO FACTORS TEND TO DEfriends profess to believe that it was impossible for him to commit the crimes, the general verdict is that he is guilty and should hang.

EARTHQUAKE AT ROME.

Italian City Violently Snaken Up-Little Damage Reported.

Rome, Nov. 2.-A severe and prolonged earthquake was felt here at 4:38 yesterday. Many houses swayed Co.'s Weekly Trade Review says: badly, walls were cracked, pictures and other articles fell from the walls and other places, people ran panic-stricken into the streets and a serious disaster was for a time apprehended. Happily the first shock seems to have ended the subterraneous disturbance and the frightened inhabitants returned to their homes. So far as is known, no serious significant at this season than it might damage was done. An inspection of the be at others. It is a time of waiting, public buildings will be made to determine the extent of the injuries if any for some weeks. that have been sustained. The vatican buildings were severely shaken but the pope was perfectly tranquil throughout the disturbance.

The series of shocks lasted about eleven seconds. Two clocks in the observatory were stopped, and the old tower of the Roman College was cracked.

Earthquake shocks were also felt at Rocca di Papa, but, although the people were thrown into a panic, no serious damage was done.

London, Nov. 2.—Special dispatches eceived here from Rome say that two houses collapsed as a result of the earthquake shock yesterday, and it is reported that several persons were injured. In adition four palaces and the Bank of Italy are said to have been rendered uninhabitable, and the Palazzo Odescalchi and five other palaces are said to be seriously injured. The vatican buildings, the quirinal, the 3:33 when they filed out of the court | main rail road station and the ministry tained some damage.

Constantinople, Nov. 2.-Advices from Marsovan, Asia Minor, show that the trouble which was anticipated by the United States ambassador. Mr. Alexander W. It is added that the would-be incendiaries have not been discovered. The dee is attributed to Armenian revolutionists. STROY CONFIDENCE.

The Recovery of Cotton Is Rapid and The Counsel For the Defence Claims Exchange Advances-Uncertainty As to Business Likely to Continue For Some Little Time-The Failures of the Past Week.

New York, Nov. 2.-R. G. Dun &

"The rapid recovery in cotton and the rise in sterling exchange to the point at which the last exports of gold were made have not increased confidence. There is a little better demand for most manufactured products, and retail distribution is fairly encouraging, and the closing of many works is less and uncertainty may naturally continue

"Cotton speculation turns for the moment on the disposition of holders to keep their cotton, which may compel higher prices, some say, however large the ultimate supply may be. Receipts are at present very small, compared with last year, and it is stated that banks here have more money lent on cotton, to enable holders to keep it without marketing, than ever before. Exports and takings of spinners are very small, and stocks abroad and here so large that consumers may be better able to wait than borrowers from banks.

"Wheat has declined 134 cents and corn 21/2 cents, in spite of many adverse reports about winter wheat. The present large shipments from other countries, the small Atlantic exports (in five weeks only 7,302,591 bushels, flour included, against 11,724,302 last year, and case would have to proceed. Western receipts for five weeks 37,705,-458 bushels, against 23,600,973 bushels last year) affect opinion more directly than ideas about next year's yield. Very large estimates of the corn crop have depressed prices, although exports have been, in five weeks, 12,212,821 bushels, against 4,823,648 last year, a fact which has its weight in the wheat marchanged, though hog receipts and packing are heavy. The heavy wheat and corn movement helps railroads, but the the others, and 5.4 per cent smaller than o'clock this morning.

ENGLAND MUST FIGHT.

Russia's Increasing Prestige in the East Will Force a War.

Washington, Nov. 2.-It is the opinon among diplomatists here that England must fight or lose her foothold in the east, and that ever since the close of the Japanese war she has been seeking a pretext for descending upon China to counteract the success of Russia and restore her own prestige. It is believed to be the intention of Great Britain, sooner or later, to occupy Nanking, just as she seized and held Hong Kong forty years ago. Nanking is the greatest city in the interior of China, and commands the commerce of the Yang 'Tze, which is the greatest river made and many persons have been and furnishes transportation for the court-martialed and shot. Order has most productive and prosperous portion of the empire. And as soon as Russia takes possession of Manchuria, the northern province, and starts her railroad down the Liao-Tung peninsula John Bull will find an excuse to occupy Nanking and organize a provisional government of his own there, supported by a British fleet. It matters not what the pretext may be, England will demand exactions which the Chinese government cannot comply with and nothing but the combined powers of Europe can compel her to loosen her foothold when it is once obtained.

A VERDICT TONIGHT IN HOLMES' CASE

MURDER TRIAL COMES TO A SUDDEN END.

the Commonwealth Has Not Made Today.

the world will probably know whether or not Holmes will hang. The decision of Judge Arnold that no testimony would be admitted other than that bearing directly on the murder of Benjamin F. Pitzel had the effect of keeping out a group of grewsome exhibits and silencing about thirty witnesses brought here from Canada, New England, and the West and supported for six days at the commonwealth's expense. It prevented the offering in evidence of the moldered was a chance for the pair to have one money will be will be withdrawn. bones of the boy, Howard Pitzel: the stove in which he was burned; the clothes the little fellow wore when he had a body to put inside them and the toys he played with, and the trunk which smothered out the lives of the girls, Alice and Nellie. District Attorney Graham fought as hard as he knew how to get this evidence in, but the law was against him.

"That is our case," had scarcely fallen from the lips of the commonwealth's prosecutor before counsel for the defense had calmly arisen and made what many persons characterized as a "bold bluff." They confidently told the court that the commonwealth had not made out its case, and asked Judge Arnold to tell the jury so and wind up the trial then and there. Judge Arnold expressed no opinion other than that the

Then counsel made the astonishing statement that they wanted time to find out what the defense was going to be. because they had been so busy listening to the evidence against them they had not had a chance to prepare an answer to it. The court finally suspended business and gave the attorneys an hour's talk with Holmes. This over, they sould call no witnesses, but submit the case on argument alone. LIKES THE TREATY.

Senator Morgan Talks of Alleged Russo-Chinese Deal.

Washington, Nov. 2.—"Whether the newspapers are technically correct in stating that a treaty has been consummated between Russia and China for the occupancy of the harbor at Port Arthur by the Russian fleet and the extension of the Siberian railroad through Manchuria, I am confident that such arrangement is among the probabilities of the near future, and when it is made the government of the United States should do nothing to prevent its consummation," said Senator Morgan, chairman of the senate committee on foreign relations." Our interests in this instance, as in most others, are antagonistic to those of England. That country is merely seeking, in antagonizing Russia in this matter, to hold the trade advantages she now enjoys in the orient, and, being her rival in the commerce of that section of the world there is every reason why we should not pull her chestnuts out of the fire.

"The proposed railroad would open up an immense domain for the interchange of trade, and by directing our influence in the right direction w ought to secure a very large share of it. Furthermore, the Siberian people are entitled, on the grounds of humanity, to an outlet to the sea. Siberia is an isolated country at best, and I, for one, should oppose any effort on the part of the United States to prevent the people of that country from securing this one ray of light."

CROP MAY FALL SHORT.

Bull Report on Wheat Issued by a Minneapolis Statistician.

Minneapolis, Minn., Nov. 2.-There have been received at Minneapolis and Duluth in the three months since August 1, 48,000,000 bushels of wheat, and figures show one-half of the wheat crop of the Northwest is now marketed. The country elevators have 18,000,000 in store, the country mills have ground 10,000,000, and 5,000,000 bushels have found their way out of the Northwest by other routes. This makes in all about 81,000,000 marketed. When 12,-000,000 for seed and the grind of the country mills is taken out of the residue, it does not appear that there is more than 80,000,000 left. This suggests that wheat receipts are bound to fall off, as there are nine months left of the crop year.

1WO NOTABLE Y. M. C. A. **MEETINGS TOMORROW**

One Will Be At the New Building Is Afternoon and the Other at the Congregational Church In the Evening -The Announcements Made By the

All plans are now complete for the closing exercises of the Y. M. C. A. campaign at the new building and at the Congregational church tomorrow afternoon and evening. At the morn. ing service in the various churches, the pastors will preach on the subject of the association, but contrary to the report circulated, there is no Y. M. C. A. authority for the statement that a collection will be taken at these services for the benefit of the association.

Especial attention is called to the afternoon meeting at the new building. Edwin Burrett Smith, of Chieago, will lead this meeting, and will speak from the subject, "The Prodigal Son's Elder Brother."

The evening service at the Congregational church will be of unusual interest. An extra large choir will sing and the Y. M. C. A. orchestra will play. The principal speaker will be A. E. Matheson and Captain Edward Ruger will also Have something to say. In addition to this, the meeting will be of interest because of the fact that the report of the 'progress and standing of the association from its organization up to the present time will be presented.

.WILL BE A LEADING ISSUE

Farmers as well as other classes are coming to appreciate the character of reciprocity. They see now that it is by all odds the most important branch ever grafted on our system of protection. It means simply and solely that for whatever advantages the United States accords other count- gratitude. ries in its markets it shall receive some benefit in return. This is an agricultural and manufacturing na tion. We produce crops in the excess of the home demand, leaving a surplus to be sold in foreign markets. We have great manufacturing industries capable of more than providing for home consumption. There are some commodities that we must buy abroad as tea, coffee and sugar, and it is desirable to pay for these as far as possible, with our breadstuffs, provisions and manufactures. That is what is contemplated by reciprocity. The republican party by putting augar on the free list in the tariff act of 1890, gave in a very valuable advantage to augar producing countries, for which it asked concessions from those countries favorable to American products. It was a fair and equitable arrangement, mutually beneficial. as the results of a brief experiment with it amply attest. Europeans readily saw its value to the trade of this country and leading statesmen abroad commended the sagacity of the party that adopted reciprocity.

It was only after the democratic party struck down policy, that Fletcher and other prominent players. as being inconsistent with its tarif scheme that the American people generally awoke to a realization of how much it meant and how great were its possibilities. The farmers of the country, whose interests and welfare it was intended chiefly to subserve, value on the street. We don't press had very little appreciation of it. A great many people regarded it rather as a political contrivance than as a practical arrangement of the greatest importance. They know better now; they look to its re-establishment as a Cough Cure as anything else. It's long step toward prosperity and they will see that the issue is kept to the front in the next national campaign.

DEMAND GOOD ROADS.

Farmers have put their demands for good roads in such practical form down east that something is likely to be accomplished. Both parties have a good roads plank in their platforms in Massachusetts, and the highway commission will ask the next legislature to appropriate \$1,000,000 to continue the work already begun with the recent appropriation of \$400,000. Construction is going forward in seventy different localities, and twothirds of the towns in the state have filed petitions for their share of the work. The state will assume the improvement and maintenance of 2000 miles of the 20,700 miles of roads SAY! Don't let the Wind outside of cities, which is about the proportion of state roads maintained in France.

BHB WATCHES PRICES

The woman who shops, price list in hand, is a new factor in local trade. City stores have known her for a generation, but "merchandising" runs at high pressure in the cities and has peculiarities of its own.

In Janesville special sales are of recent introduction. How fully they are accepted, however, is shown by the number who take advantage of them and call for strict fulfillment of every promise. No part of The Gazette is read more assiduously than the advertising columns and no part shows greater improvement during the last year. Each day sees trade literature advance. It must advance for the woman of today reads discriminatingly before she shops.

Brice is pouring money into Ohio but it is used to bolster up assembly men James E. Campbell, that good democrat and faithful striver after. votes, is being let severely alone. He may sink or swim-it makes no difference to Brice-but his own success or failure strikes Mr. Brice as very important. That's the kind of a patriot Mr. Brice is now and always been.

A Japesville literary society will detate next week on the Monroe doctrine. The speakers must go back to a republican administration to find out what the doctrine really is Mr. Monroe, himself, wouldn't recognize it in the battered and mutilated form it has assumed under Mr. Oleveland's manipulation.

Gladstone emerges from his retirement long enough to write a bitter letter against the sultan of Turkey; yet if Mr. Gladstone had taken advantage of the opportunities he had while prime minister, there would have been no sultan of Turkey these years past.

Sepator Palmer's announcement that he would not seek reelection to the senate was superfluous. Nobody thought he would do such a thing at the hands of the republican legislature, which Illinois will have.

It was not the coldness of the people so much as his failure to find any third-term sentiment that disgusted Mr. Cleveland with his trip south.

This evening at the Myers Grand the pretty and accomplished comediene, Emily Bancker and a company especially selected will present the amusing farcial comedy, "Our Flat," which she has so successfully starred the last two seasons. Of Miss Bancker's ability we hear nothing but the most favorable reports, having for several seasons before venturing on a starring tour for herself, been engaged by Manager Charles Frohman to head the numerous successful comedies he has of late years presented at his New York theatre.

"Our Flat" ran over 700 nights in London, and 100 nights at Daniel Frohman's fashionable Lyceum theatre, New York. The cast includes Will Mandeville, Philip H. Ryley, George W. Parsons, Charles Leonard

THE SHIRT MY FATHER WORE.

[From the Chronicle.] My father bought an undershirt
Of bright and flaming red—
"All-wool," I'm ready to assert,
"Fleece dyed," the merchant said.
"Your size is thirty-eight, I think,
And forty you should get,
Since all wool goods are bound to shrink
A triffe when they're wet."

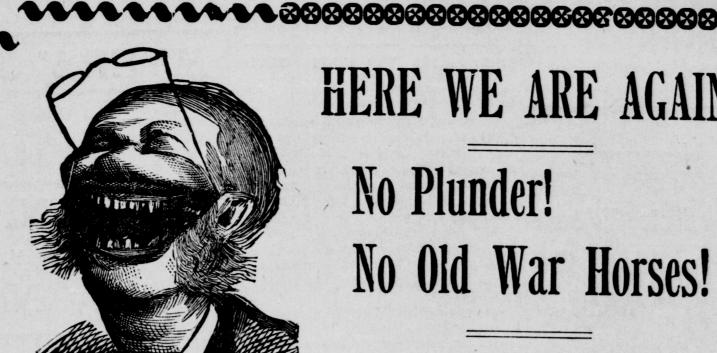

That shirt two weeks my father wore-Two washings, that was all-From forty down to thirty- our It shrank like eaf in tall. I wore it then a day or two, But when 'twas washed again wife said: "Now 'twill only do

For little brother Ben," A fortnight Ben squeezed into it, At last he said it hurt We put it on our babe—the fit Was good as any shirt We ne'er will wash it more while yet We see its flickering light,

ENGINEER BRAZZLE IS NOW IN HIS BED

WELL KNOWN C. & N. W. MAN HURT LAST NIGHT.

Injuries, However, Are Not Dangerous, Although Painful-Ran Into a Freight Train That Stood Just Around a Curve-Fireman Somewhat Bruised.

Henry Brazzle, one of the been known and most popular engineers on the Chicago & Northwestern road, lies in bed at his home on South Academy street, as the result of a crash in the dark near Roscoe, Ill., last night, and while his injuries are not at all dangerous, they are painful and will keep him housed for some

Engineer Brazzle was "pulling" the Belvidere passenger, Conductor Devina' train last night, while Engineer Sherwood was on a two days' vacation. The train left here at 6:40 o'clock in the evening and all went from Washington on his patent hose to have left her husband under the well until they were a few miles out coupler. of Roscoe, when Engineer Brazzle saw the glare of a headlight in front of him. He put on the "air," but was soo late, and the engine poked its pilot into the caboose that was attached to a freight train that was standing still on a curve. Engineer Brazzle and Fireman Lafferty had a marrow escape from death, both being injured, but the fireman less painfully ply to L. R. Treat. than the engineer. BOY GETS FRIENDS TO CARE FOR HIM.

Refuses to Let His Father to Know His Whereabouts and Says He Wil Shoot Himself Rather Than Go Home-Hobbles About On a Broken

Rynt Troff, a wealthy farmer c: me all the way from Michigan to see his son Peter, who has been laid up in this city. He got here today, but no a telegran the boy had thrown away his crutch, hobbled downstairs with his knee in a plaster cast and went out into the country.

Peter broke his leg in Chicago, where with Webb Hill, son of Mrs. W. H. CHARLES HORN was down from Lake Hill, of 101 Washington street, First Koshkonong last evening, and reports ward. The Hills took a great fancy to him.

"You can't see your boy," Mrs. Hill AL L SOULS, The People's Church told Troff. "He is where you can't find him, and if you do find him he says he will kill himself. He will not submit to your treatment any longer."

Troff is still in town. He says he is worth \$30,000 and will spend a fair share of that \$30,000 in finding his boy, who is not yet of age.

DISMOUNT NOW AND THEN.

fors Rides Without a Change of Position

Can Hardly Be Beneficial. "We rode from Dan to Beersheba without a dismount." Remarks of this tenor are heard very frequently. Now it is excellent to be able to ride 10, 20 or 30 miles, or as far as you please, without dismounting and without being all broken up afterward, but brief consideration of the subject shows that on general principles prolonged riding without getting off occasionally is entirely against common sense and opposed to all hygienic laws.

The one drawback to cycling as an exercise is that the rider is compelled to sit on the machine in one position, an evil which can be entirely offset by stopping now and then for brief relaxation. It is neither rational nor natural to maintain any single posture long at a time. Any one who has posed as a "waxwork" or done military duty knows what this means. Nature vigoronsly opposes any and all forms of bodily rigidity, and it cannot possibly be well to hold one's self to the sadlde unceasingly for hours at a stretch. Of course all of us have spells of wanting to see how much we can do to spite nature's laws, and the arbitrary dame is fortunately given to letting merely occasional offenders off easily, but persistent violation is, as a rule, severely dealt with, and we are convinced riding from Dan to Beersheba at one sitting is a chronic violation on the part of many eyelists. It would in the end be far better for them to ignore whatever cheap glory is incident to feats of the sort and walk the hills or take occasional five minute loafs by the wayside. - American Cyclist.

CYCLISTS KNOWN TO FAME

Sarah Grand, the author of "The Heavenly Twins," has learned to ride the bicycle.

Lady Londonderry is the captain of the Lady's Cycle club of South and East Durham, England.

James J, Corbett, the champion pugilist, is a very swift bicycle rider. He thinks very highly of the wheel as a training adjunct.

James Whitcomb Riley, the Hoosier poet, has taken to the bicycle. Early every morning he may be seen on the asphalt pavement of an Indianapolis

Mr. Chatfield-Taylor, Chicago's Ward McAllister, rides, but more as a useful than a sportive measure. Mrs. Chatfield-Taylor found that golf was enough for one summer and gave up the bicycle early in the fray.

A. Conan Doyle, the famous novelist, says: "I have myself ridden the bicycle most during my practice as a physician and during my work in letters. I can only speak words of praise for the bicycle, for I believe that its use is commonly beneficial and not at all detrimental to health except in the matter of beginners who overdo it."

Lillian Russell, says the New York Telegram, probably has the prettiest bicycle ever made. The handle bars, the hub and portions of the frame are made of gold. The rim and spokes are of white riding suit of close fitting bloomers and stylish short cut coat over a dainty shirt waist, the fair singer presents a pretty picture as she spins along. In spite of her weight Lillian is a graceful rider and can make good speed.

WHEELING WISDOM.

A merciful man will be merciful to his wheel.

A boy can't get very close to evil companions while he is riding a wheel. Outdoor exercise is a great medicine,

and the bicycle makes it easy to take. Road improvement means human improvement, and the bicycle promotes

The low stoop of the bicycle rider may appear distressing to others, but it is quite clear that the one who assumes it thereby "doubles" his pleasure, if he has any. -L. A. W. Bulletin.

The Motor Bicycle's Speed.

There are two motor bicycles capable of developing considerable speed. One is an American invention, the other German. They are driven by gasoline engines. The German machine has its heavy driving motor set in the middle distance between the wheels. The American machine is less cumbersome. It looks an ordinary safety with a piston and cylinder attached to the back wheel It is said these machines can develop a speed of 50 miles an hour. -Chicago Tribune.

A Somnambulist's Queer Ride.

Lemuel Dook, son of the proprietor of the Eagle hotel at Flemington, N. J., is an expert bicycle rider, and last week on the night of the full moon he arose in his sleep and wheeled all the way to Bound Brook. As he wore a night gown and nothing else his appearance as he passed down the main street created a sensation. Constable McSally woke him up, and he was loaned a suit of clothes by Yardmaster Flagg —New York Mail and Express.

STATE OF WISCONSIN—COUNTY COURT FOR hOCA COUNTY—In Probate
Notice is hereby given that at a regular term of the County Court to be held in and for said county at the Court House, in the city of Janesville, in said County, on the first Tuesday, being the fifth day of November, 1896, at 9 o'clock, a. m., the following matter will be heard and onsidered.

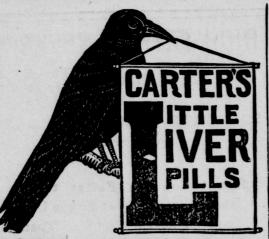

The application of Ellen M. Johnson for the appointment of an administrator of the estate of Herman R. Johnson, late of the city of Janesville, in said county deceased.—Dated October 11, 1895.

By the C urt,
J, W. Sale.

County Judge.

An 1896 bicycle recently completed weighs 171/2 pounds, and it is what might be called a semiroad or half racing wheel, or the scorcher's delight, or the sensible rider's horror, compared with the 1895 model. The tubing is much larger, while the rim and tires are much larger, while the rim and tires are tor on corner North River Street and Mineral much smaller. The frame is made of Point avenue or at Sanborn's Grocery store. 114 inch tubing, while the tires appear to be about an inch in diameter. The handle bars are adjustable. - New York Tribune.

You Take No Chances.

Neither do you run against a lottery in buying Dry Goods at this store. The month of October shows the record of a great business month, -- - a thirty days in which was concentrated the largest business ever done by this store during any corresponding month in past years. Popular prices upon popular goods is a combination strong enough in itself to neither require a game of guess nor the uncertain elements of a lottery to push it along. Some merchants bid for patronage one way, some another; one man gives you your chromo and the next one the frame, both, by the way, gems (?) of the first water. To the shrewd trader such wiles are a snare and a delusion, and the economical woman buys her goods where she knows she can do the best. (There are hundreds of them who know that this statement applies particularly to this store.)
